## Maternal genetics...Made in Montana

DRC 101VM x, 'Dover', comes from an outstanding maternal line of females within a herd long known for superior maternal genetics.

### Check out Dover's stats:

- Top weaning ratio of 16.87 out of a contemporary group of 45 bull calves (11 sired by Red Angus).
- 205-day weight was 607 lbs. - remarkable considering the tough range conditions at the Dover Ranch Corporation during the past drought. These are 'range tried and tested' genetics!
- GeneStar tested!

Quality Grade	GeneStar				GPD	
	Q01	Q02	Q03	Q04	Q05	Q06
Tenderness	*	0	*	0	10.49	1 GPD
	T1	T2	T3	T4		
	*	0	*	0	-0.7	
Feed Efficiency	FE1	FE2	FE3	FE4	FE GPD	
	*	*	0	*	-3.26	

## Dover's Calves

"Frank and I ran out today and looked at your bull. He sure is impressive in every way and I feel he could sure do this breed a lot of good."

-comment by Dover Sindelar, Dover Ranch Shorthorns, from a letter dated 12-4-07

**Semen: \$20/unit; \$10/certificate**
